#3850 LIQUID SOAK CLEANER

#3850 SOAK IS A DARK, AMBER COLORED CONCENTRATED LIQUID CLEANER FOR USE ON FERROUS METALS. IT CAN BE MIXED WITH WATER AT HIGH TEMPERATURES SAFELY, UNLIKE POWDERED CLEANERS, WHICH MAY TEND TO ERUPT.

PROCEDURE:

NORMAL USE: START WITH THREE PERCENT BY VOLUME, AND INCREASE TO TEN PERCENT, DEPENDING UPON AMOUNT OF SOIL ON PARTS.

HEAVY SOIL REMOVAL: HIGHER TEMPERATURES, LONGER TIME IN CLEANING STAGE, AND HIGHER CONCENTRATIONS ARE RECOMMENDED.

#3850 CAN BE FED BY AUTOMATIC FEEDER SYSTEMS, WHICH USE CONDUCTIVITY PROBES TO MAKE PUMPS FEED. OTHERWISE, TITRATION IS THE SAME AS ANY ALKALINE CLEANER.

#3850 IS PACKAGED IN 55 GALLON STEEL OR NON-RETURNABLE PLASTIC DRUMS, 275 GALLON RETURNABLE PLASTIC TOTES, OR SHIPPED BY TANK TRUCK, IF SUITABLE STORAGE TANK IS PROVIDED.

#3850 CAN ALSO BE USED IN APPLICATIONS SUCH AS DEGREASING AND ENGINE/MECHANICAL CLEANING.

PROTECTIVE CLOTHING, SUCH AS EYE SHIELDS, RUBBER GLOVES, APRONS, AND RUBBER BOOTS, SHOULD BE WORN WHEN HANDLING THIS MATERIAL.
